

Cheap Office.

Thank you for choosing our products. Before the installation read carefully this instructions. For any clarification or technical support contact our customer service: www.cheapoffice.it

1) Remove the cap on the front side of the cartridge, positioning the cartridge with the aperture to the top.

2) Insert the ink bottle spout in the aperture, keeping it in vertical position.

3) Unscrew clockwise the spout to let the ink flow.

4) Squeeze the bottle until esauسته to fill the cartridge inkbag leaving a little space between the spout and the aperture to let the air out.

5) Close the aperture with the cap.

6) Insert the needle in the syringe.

Refill system EPSON Stylus Pro
7700/9700/7890/9890/7900/9900 Osmo Ink 700 ml.

INSTALLATION GUIDE

7) Insert the syringe in the ink exit valve.

8) Aspirate the air remained in the inkbag. To do that aspirate 15ml of ink then empty the syringe inside the bottle and repeat the operation.

9) Insert the cartridge in your Stylus Pro printer and close the cover.

IMPORTANT NOTE: The cartridge are equippe with a chip that can be used for 700ml, after that you should use the proper resetter. Before starting to print check the ink amount is sufficient to **avoid that the cartridges run completely out of ink.**
