

Gilt Filler Sticks

- Blended wax filler for replacing missing pieces of gilt picture frames
- Fills large splits and cracks, such as poorly assembled mitre joints
- No-heat required
- All colours are intermixable
- Easy to use
- Quick drying

Product use

Liberon Gilt Filler Sticks are available in a wide range of colours and are perfect for making small repairs and filling nail holes or gaps in mitre joints. Gilt Filler Sticks do not require a heat source and do not shrink when hardened.

Application

Scrape off some shavings from the wax, enough to fill the damaged area, and soften with your fingers. Press into the crack or hole using a Liberon Plastic Scraper or other suitable tool. Level down with the scraper and buff off the excess with a cloth.

Important: always test products on a spare surface or inconspicuous area for colour, compatibility and end result.

Colours

Chantilly, Compeigne, Rambouillet, St Germain, Trianon and Versailles

Packaging

25 g BP
