

Iron Paste

- Ideal for use when renovating cast iron fire places and surrounds
- Suitable for use on wrought iron
- Reduces the possibility of rusting
- Does not flake off
- Bakes itself onto the surface
- Can be buffed to a high shine

Product use

Liberon Iron Paste is a black graphite paste producing a silver / black look to decorative cast and wrought ironwork in the home. It is specially suited for ornamental ironwork, cast iron grates, surrounds and fire irons.

Application

Before applying the Iron Paste make sure the surface is clean and free from rust using Liberon Rust Remover.

Apply the Iron Paste sparingly to the whole surface with a brush or cotton cloth. Allow to dry for a minimum of 4 hours before buffing with a brush or cotton cloth.

To obtain a decorative, patinated finish on sculpted or high relief pieces, carefully polish the raised area with a cotton cloth.

Important: Always test product on a spare surface or inconspicuous area for colour, compatibility and end result. Do not apply to hot surfaces..

Cleaning and maintenance

Re-apply and buff as necessary. Clean brushes in white spirit.

Precautions

- Always wear rubber gloves when using this product.

Packaging

Iron Paste is available in 250 ml containers.

Health and Safety

Flammable. Keep out of reach of children. Use only in well-ventilated areas. If swallowed, do not induce vomiting, seek medical advice immediately and show this container or label.
